

# Sketch and Visual Effect Demonstration

# Plan Evaluation

It is more Like Slides to show a Story one by one. People could Realize what Happened on you, while you are still Difficult to Figure Out who you are actually.

Lack of Connotation and Little Sense of Substitution.

It is like Walking into One's Inner World and Exploring the Differences Hidden in it.

More like Telling than Finding as well, and too Many Images will cause a Confusion.

Conclusion: I will use Paper Boxes and Build them into Shapes, then Map the Video on Boxes.

Participate in and Manipulate these Stories to Find the Meaning of these Actions.

There is a Participation but it is still more like Someone else's Story.

Become a part of the Video and Guide the Audience to Understand the Development of the Story Together and Participate in the Exploration Together.

Boxes are Easy to Handle and Disassemble and Reassemble. The Content is Concise and the main Character is Clear.

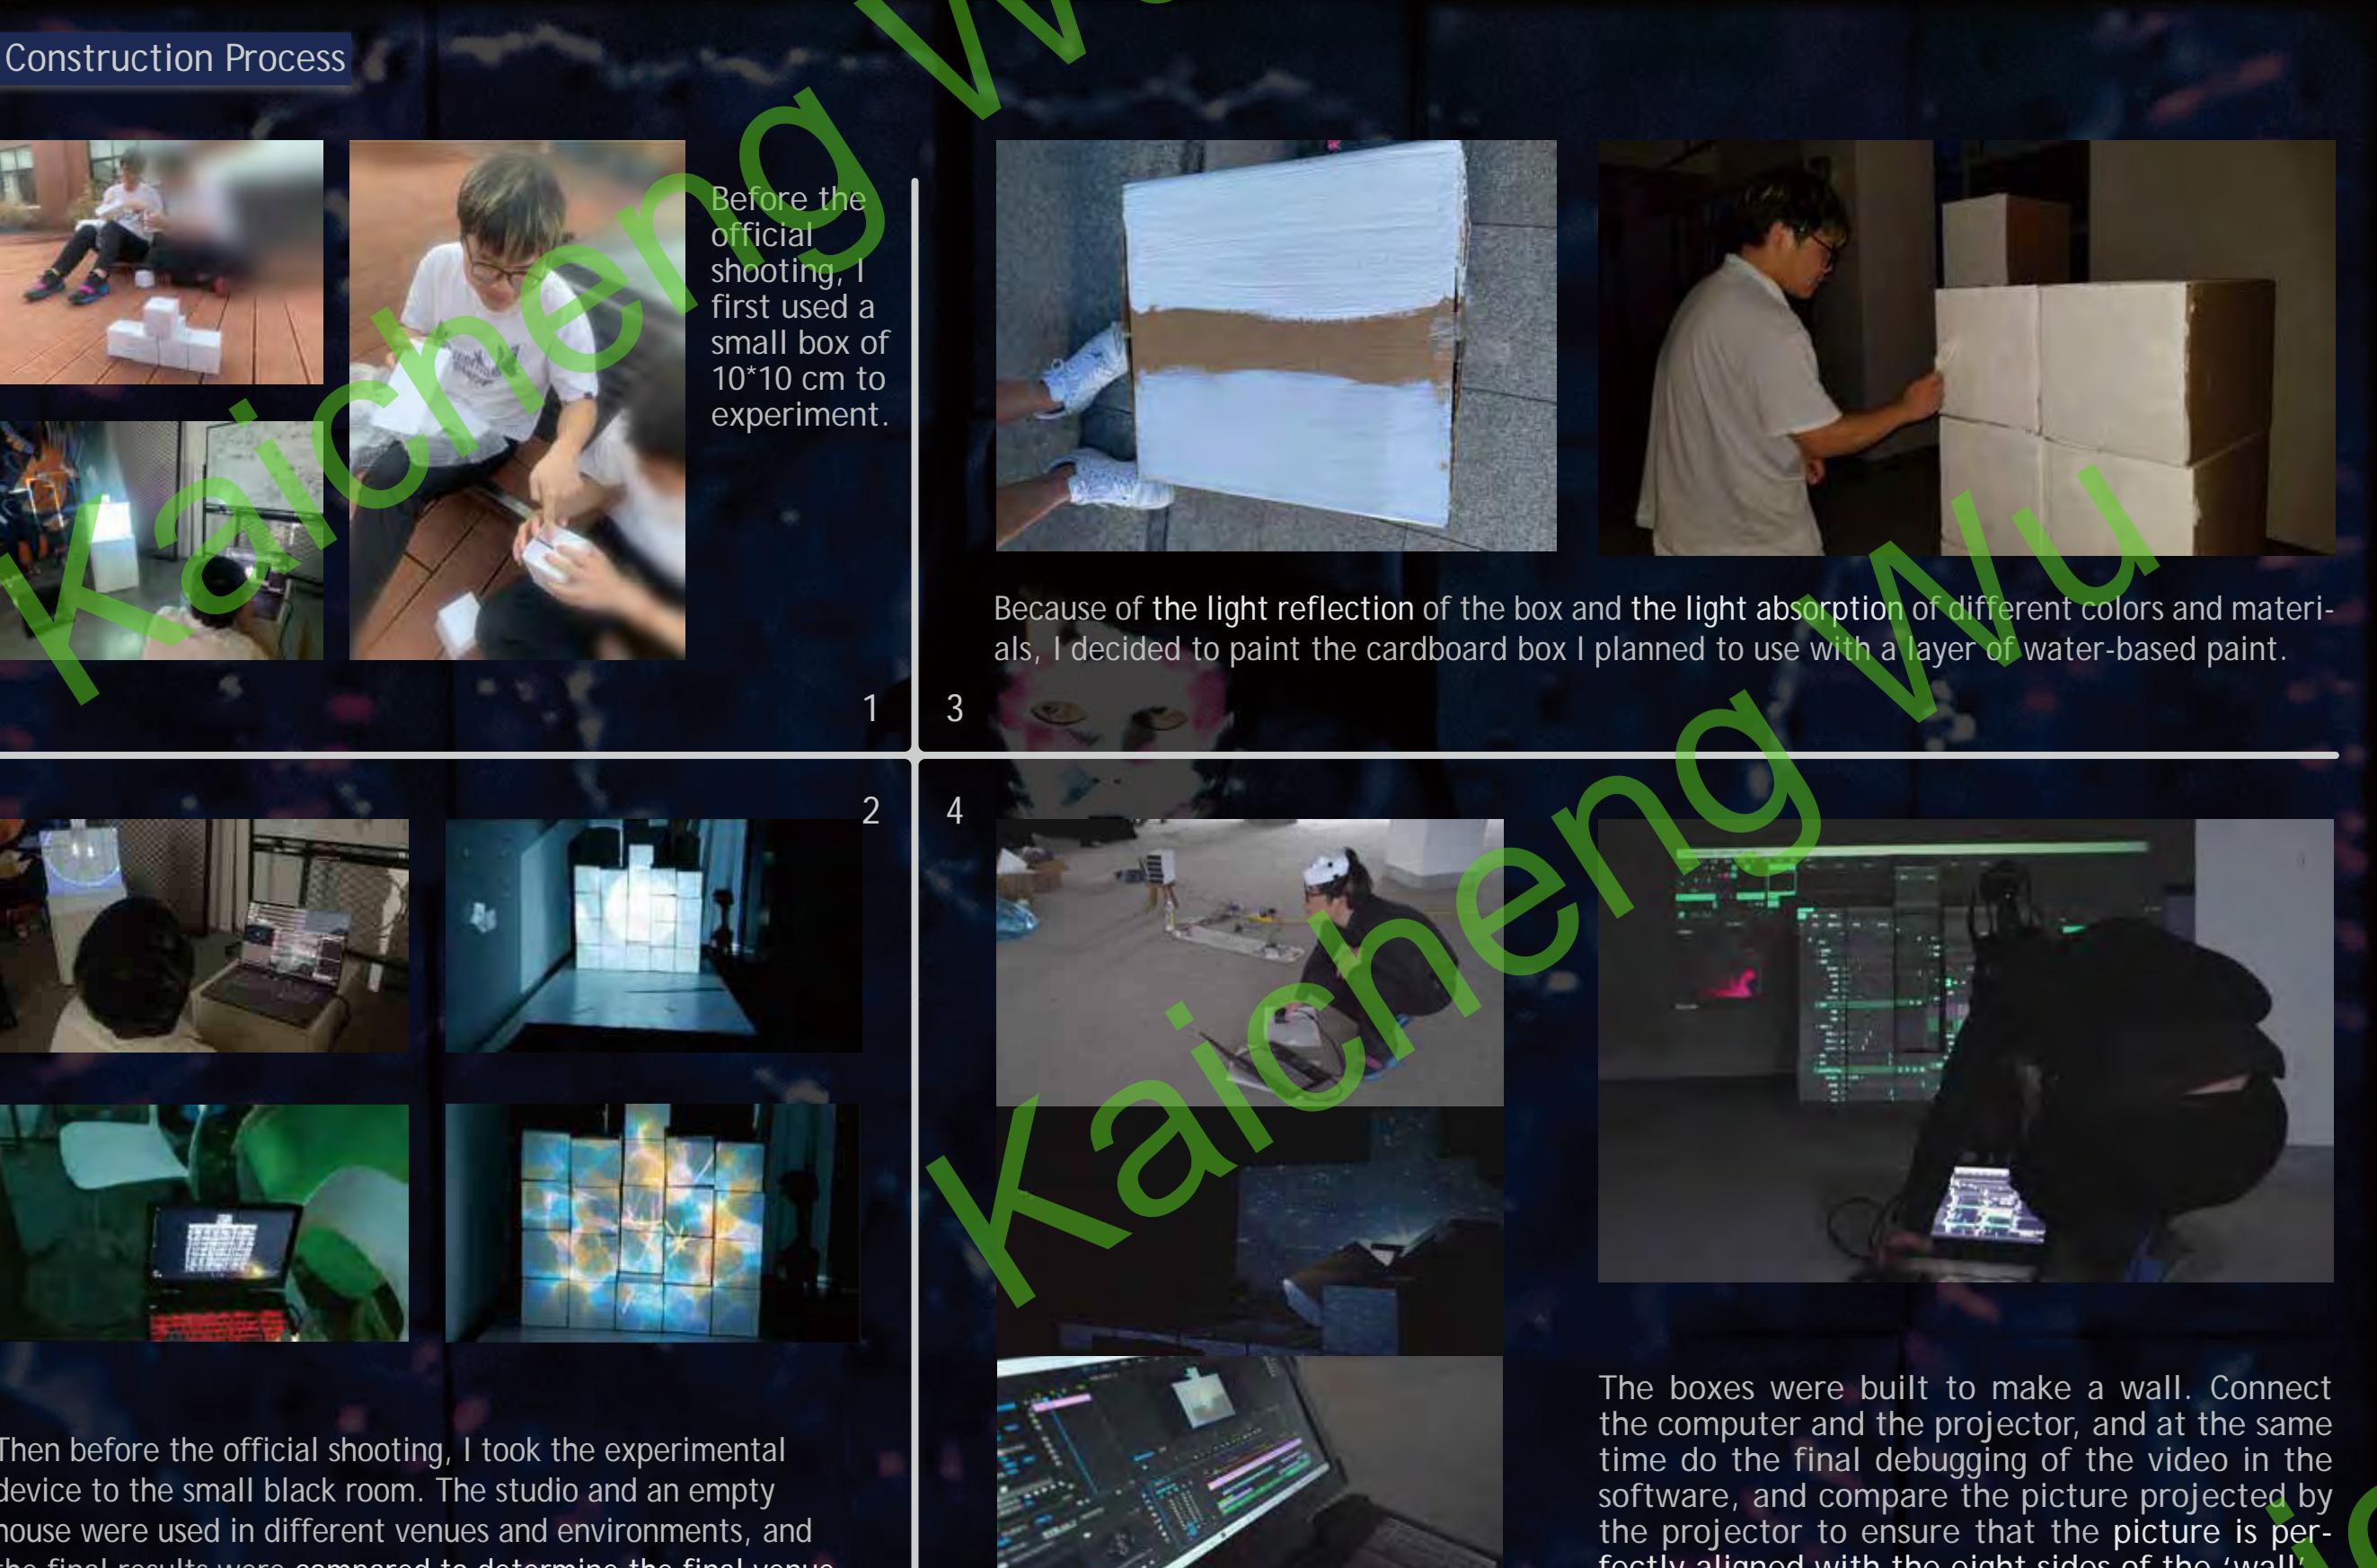

# Why 22 Boxes

# Form Structure

# Preparation Process

# / Experiments

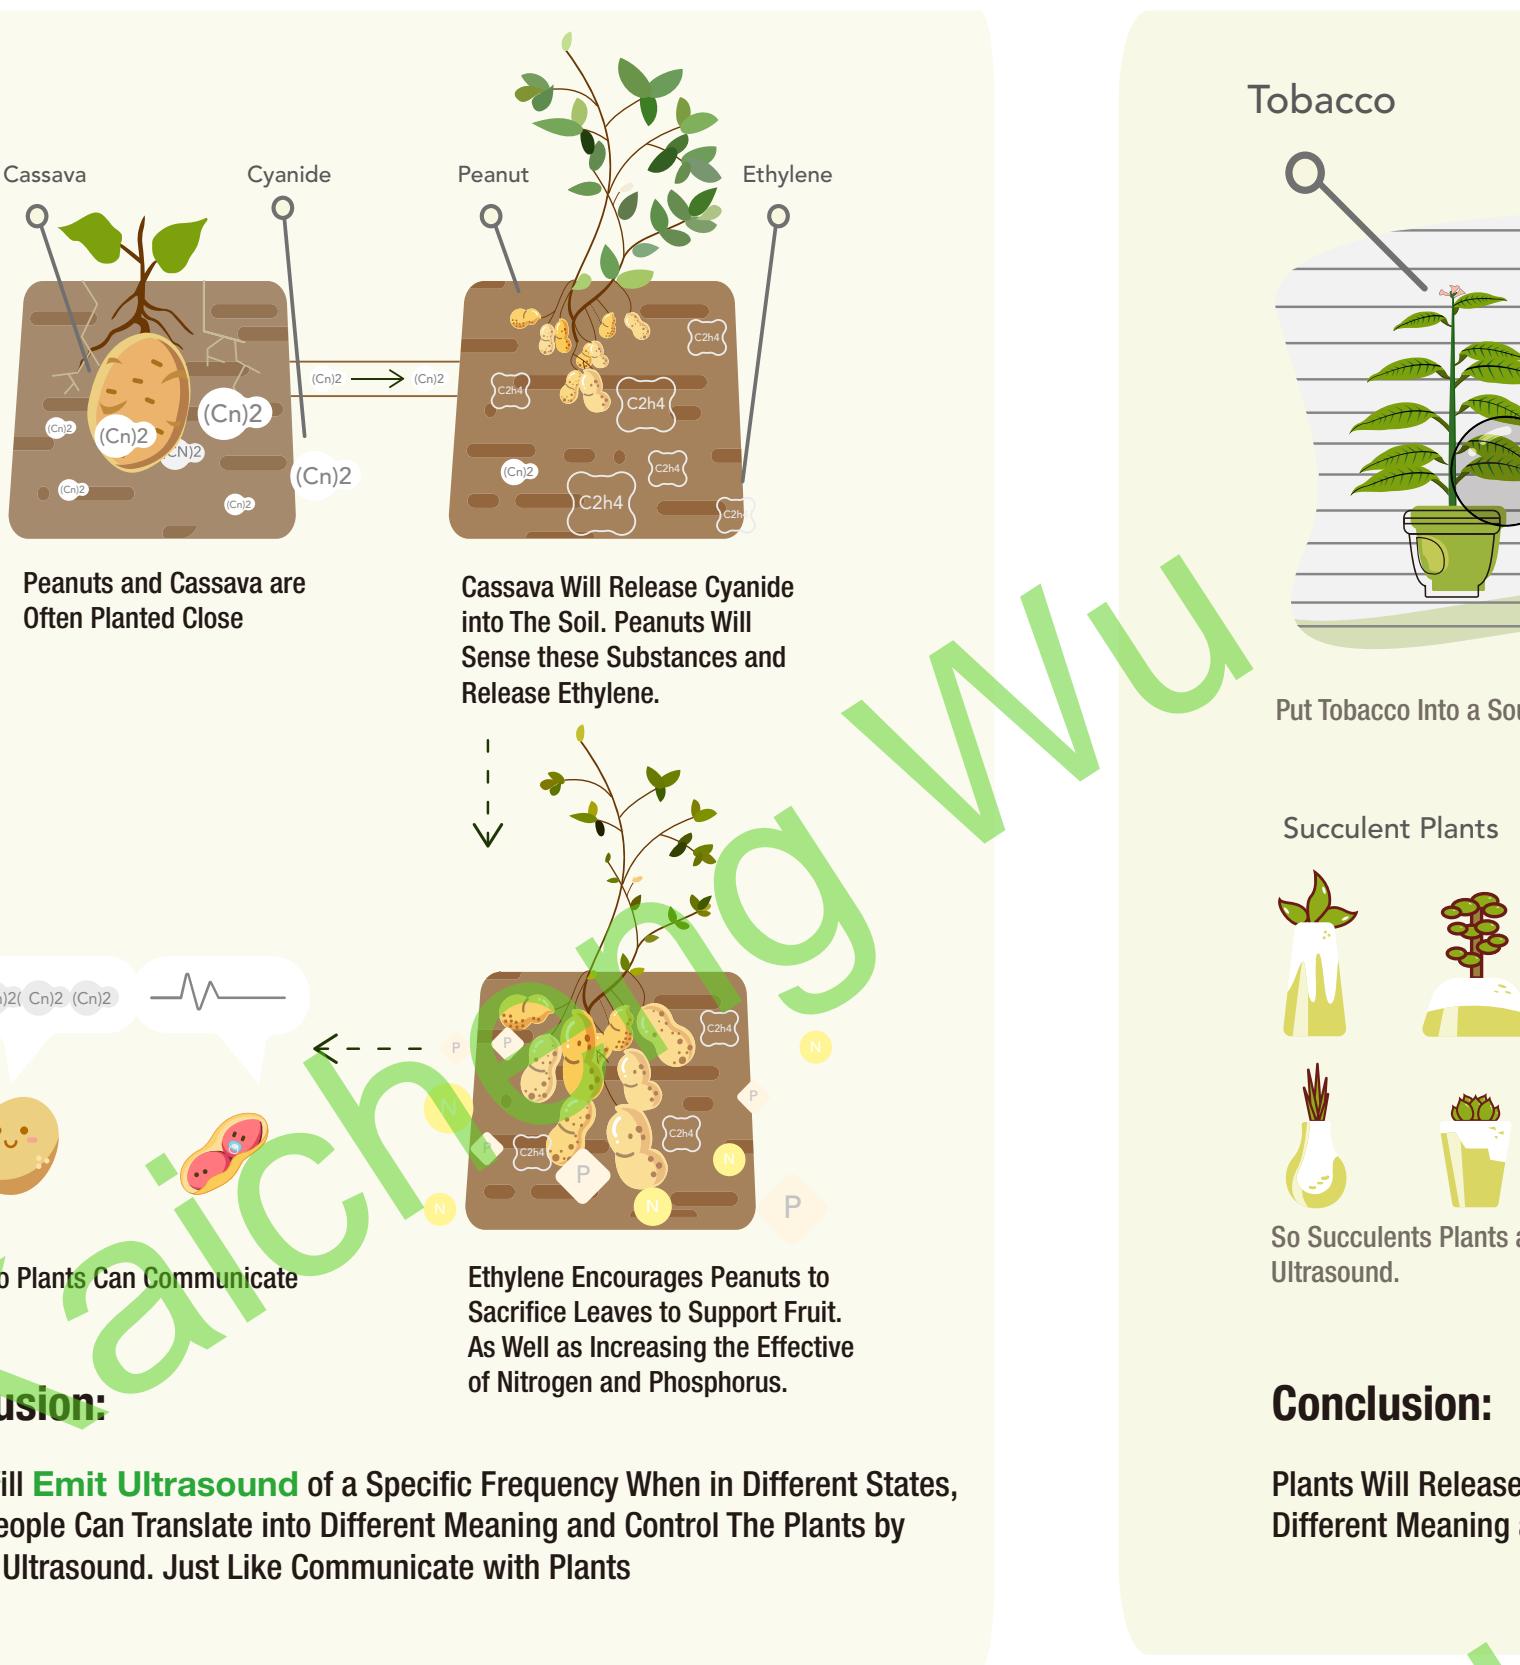

## / 1 Plants Use Physical Condition To Express

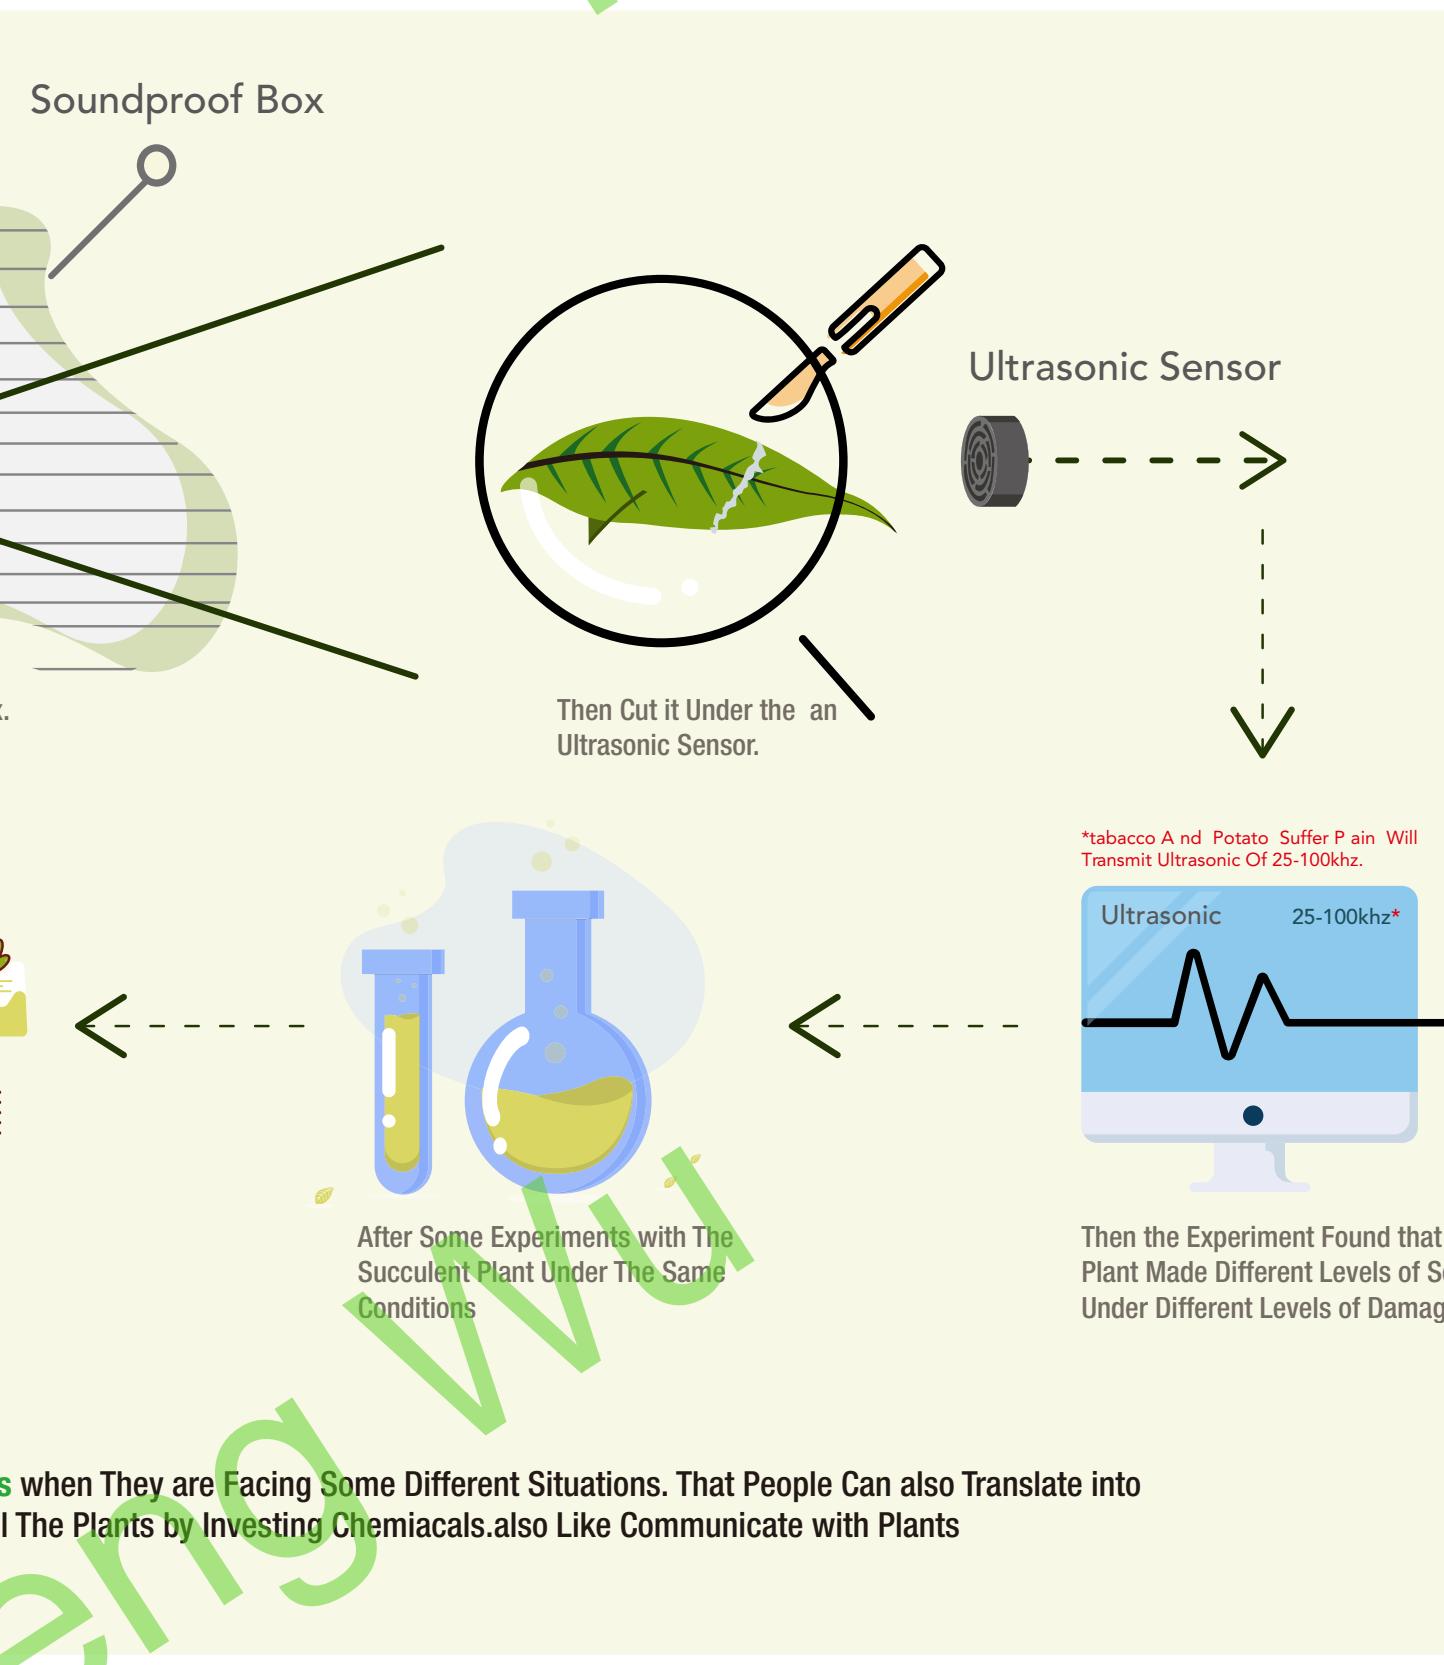

### Observation Research:

From My Experience, I Found that the **Physical State** of Succulents is Already a Way to Express Their Own Ideas. But that Only Stays on the Surface, It does not Really Work. Then I Discovered Another Form.

## / 2 Plants Use Chemicals To Express

## / 3 Plants Use Ultrasound To Express

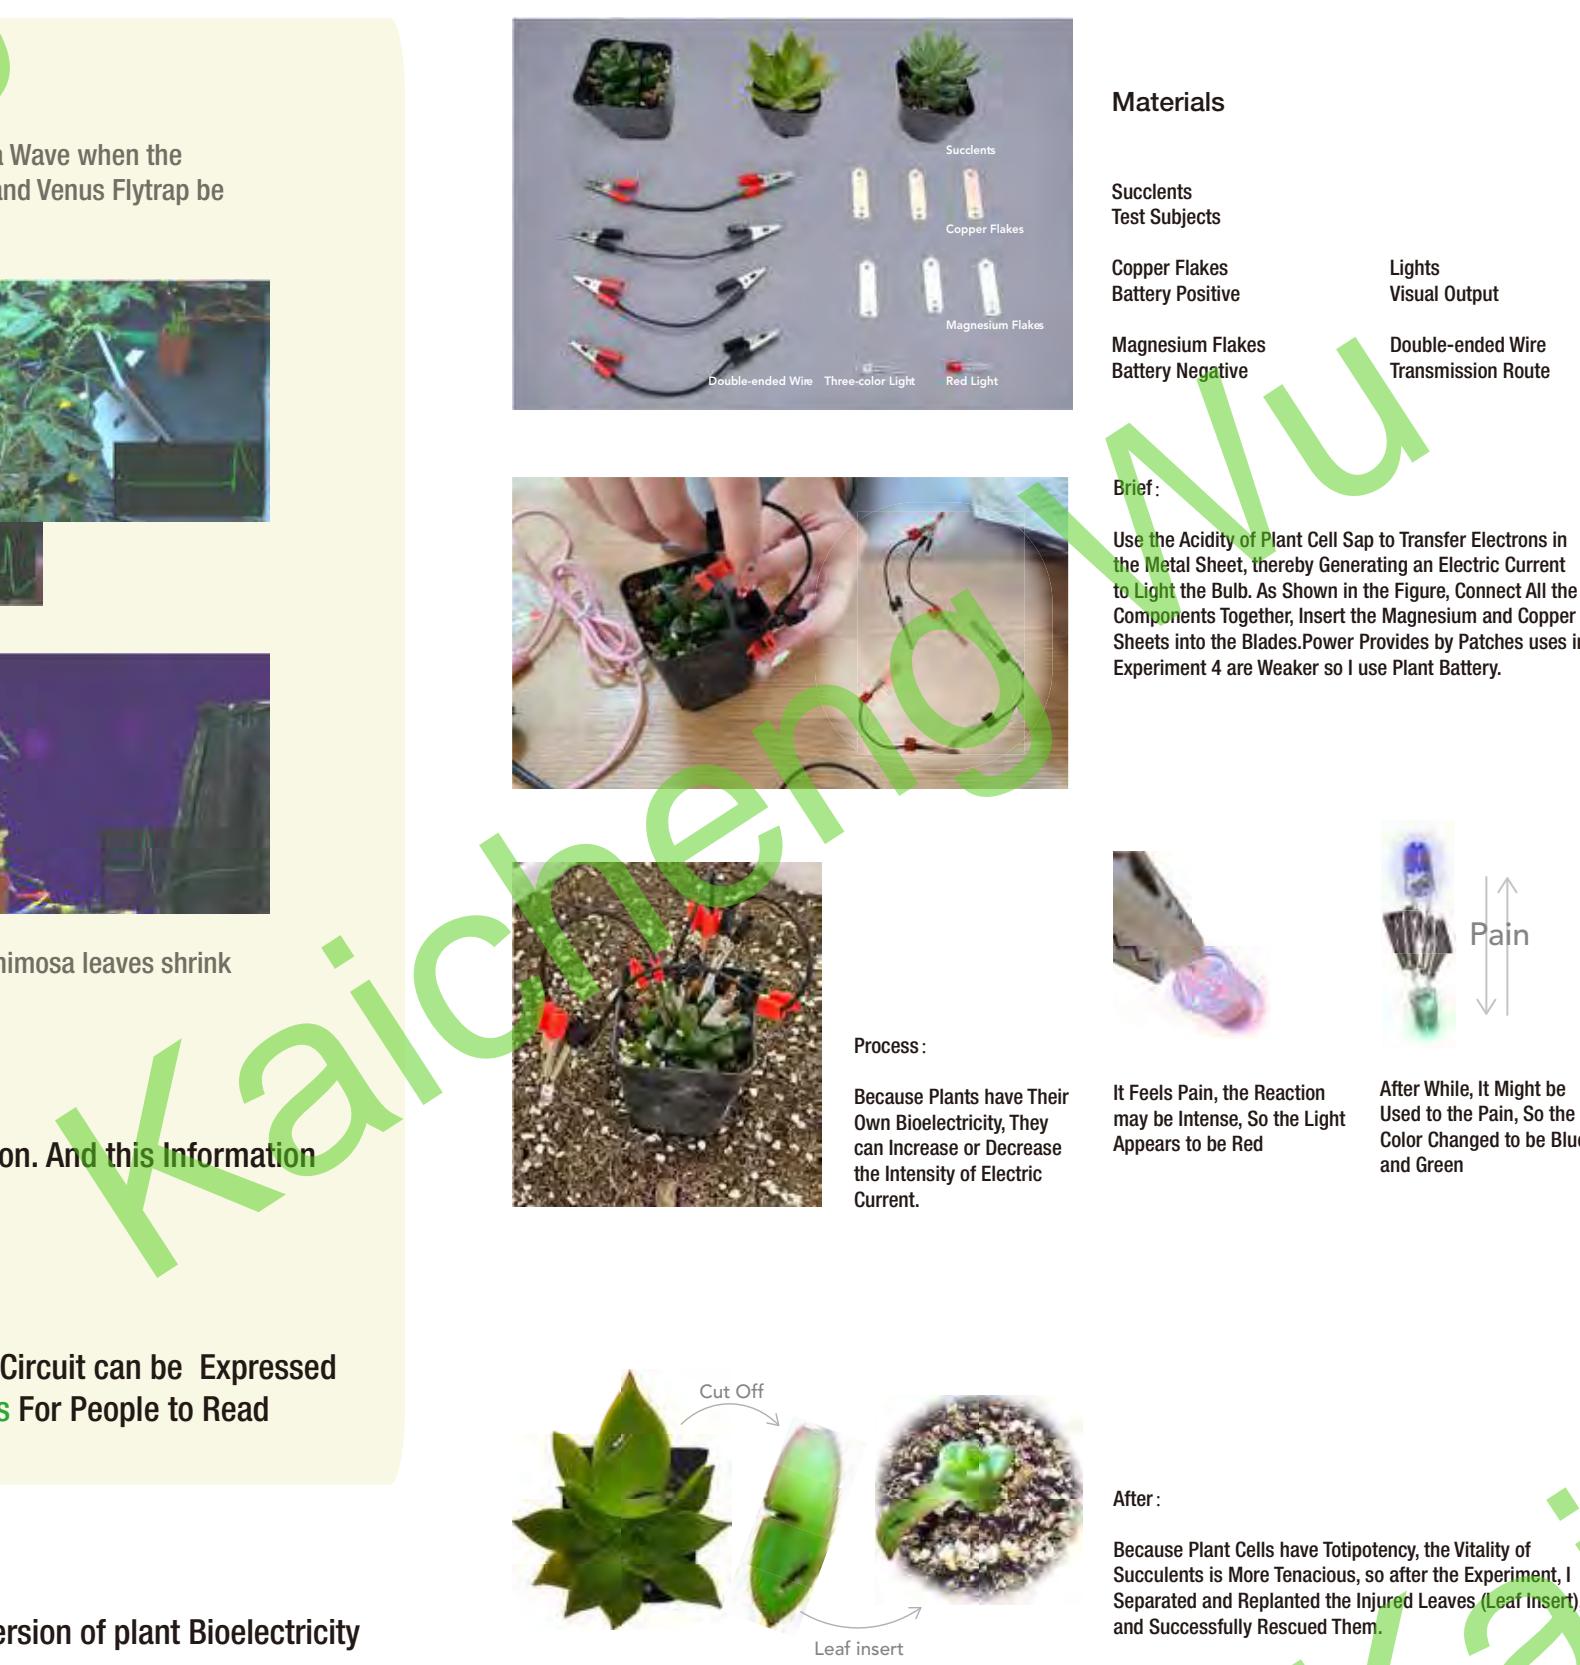

## / 4 Plants use Electric Current to Express

## Analysis And Summary

### Frequency Of Care

Most People Water Plants **Twice a Day** and Occasionally Forget but Others Will Do That.

### Planting Experience

Have at Least **Three Years** of Planting Experience

### Variety Of Plants

Mainly **Succulents**, Obey Their Own Preferences

### Forms Of Watering Plants

The Most Delicate State is to **Spray** From Top to Bottom with a Spray, but Most of The Time Water is Poured Directly into the Soil.

### Watering Frequency

Only Bought Water Can to Water Extra. Twice a Day, Once a Week, Natural Light, Sprayed from the Top.

### Receive Illumination

Generally Use Natural Light, Sprayed from the Top.

### Watering Mode

Only Bought Water Can to Water Extra. Twice a Day, Once a Week, Natural Light, Sprayed from the Top.

### Interaction With Plants

Interaction With Plants, Emotion With Plants, Other Problems.

### Emotion With Plants

Interaction With Plants, Emotion With Plants, Other Problems.

### Other Problems

Interaction With Plants, Emotion With Plants, Other Problems.

### Become a Habit

Accompanying Without Saying a Word, Become a Habit, Always Caught in a Crisis.

### Always Caught in a Crisis

Accompanying Without Saying a Word, Become a Habit, Always Caught in a Crisis.

### Planting Experience

Have at Least **Three Years** of Planting Experience

### Watering Frequency

Exclusive Treatment for Specific Plants, Put A Place and Leave It Alone, Pour Water into The Soil Directly.

### Receive Illumination

Exclusive Treatment for Specific Plants, Put A Place and Leave It Alone, Pour Water into The Soil Directly.

### Watering Mode

Exclusive Treatment for Specific Plants, Put A Place and Leave It Alone, Pour Water into The Soil Directly.

### Interaction With Plants

Exclusive Treatment for Specific Plants, Put A Place and Leave It Alone, Pour Water into The Soil Directly.

### Emotion With Plants

Exclusive Treatment for Specific Plants, Put A Place and Leave It Alone, Pour Water into The Soil Directly.

### Other Problems

## / Function Requirements

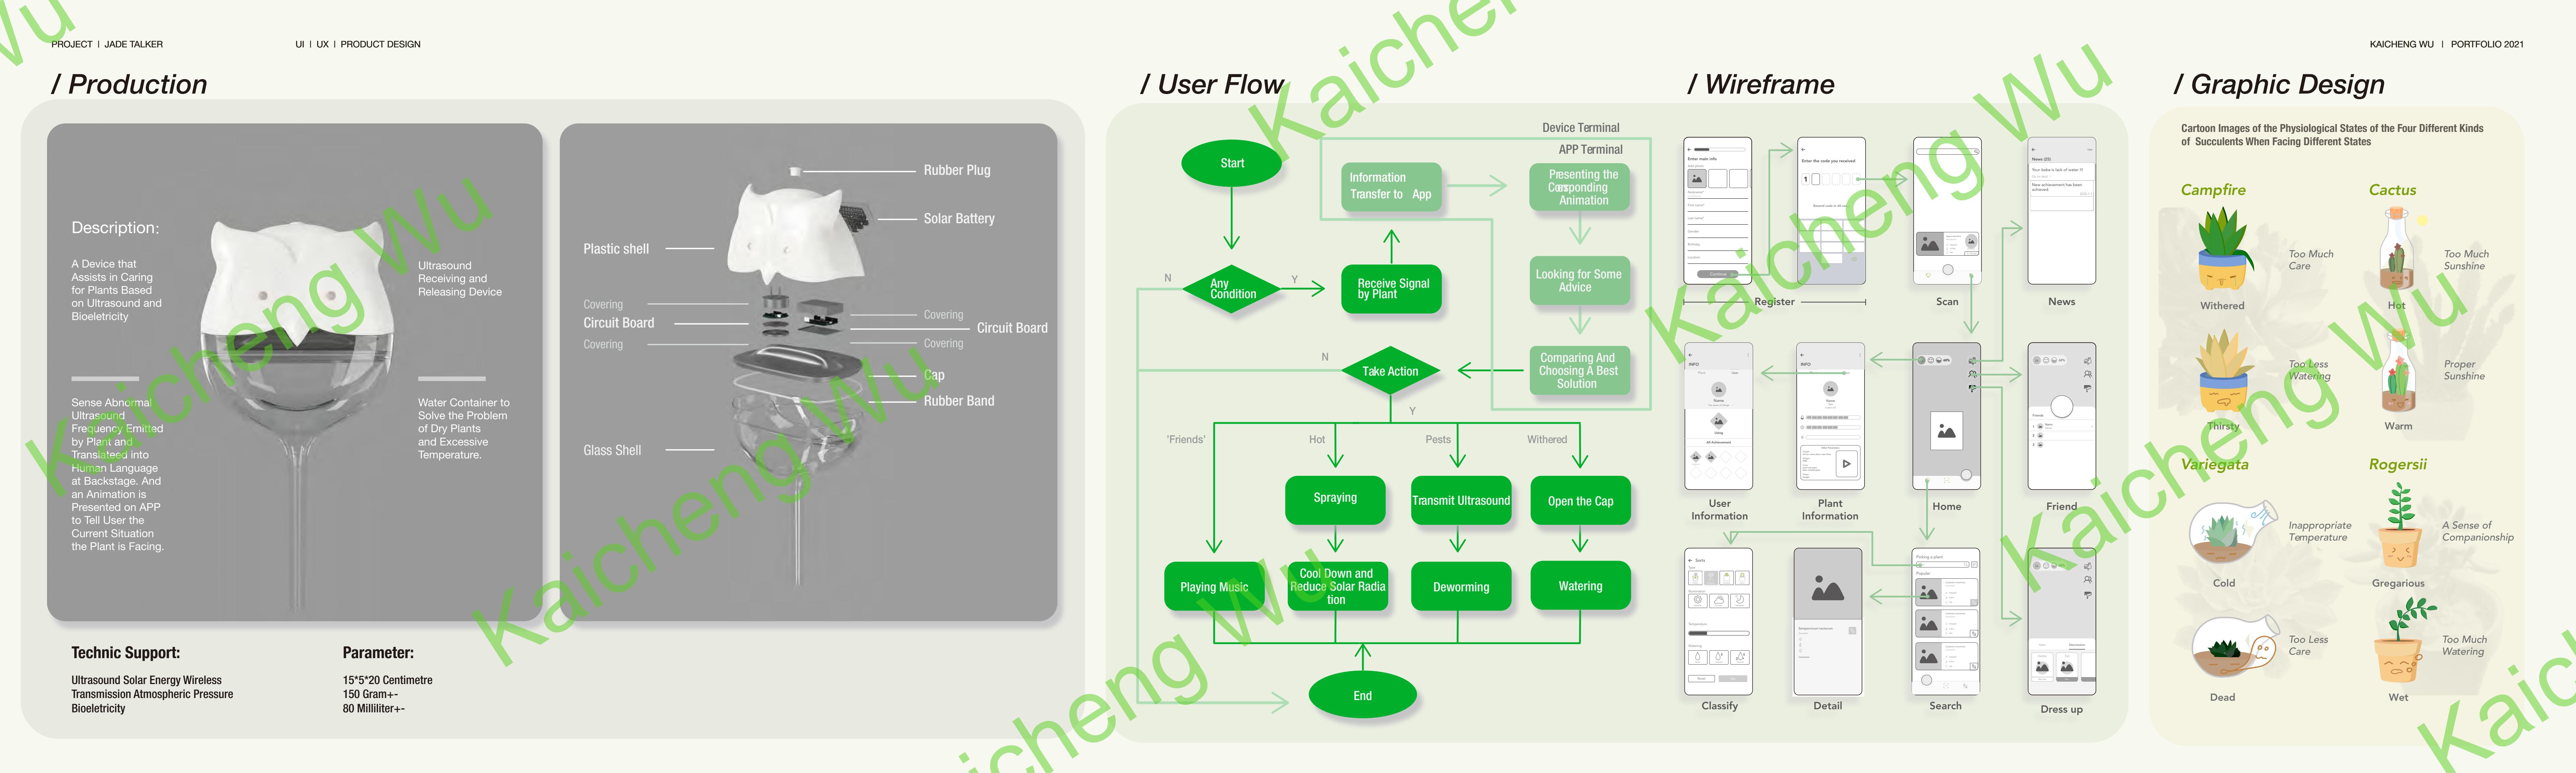

## / Material Analysis

Material	Plastic	Metal/Alloy	Glass	Timber	Other(Man-made)
Species	Plastic	Metal/Alloy	Glass	Timber	Other(Man-made)
Water resistance	Water	Water	Water	Water	Water
Sun protection		Sun			
Anticorrosive					
Harmfulness					
Weight					
Conclusion	Use Plastic to Form Technical Modules and Glass to Serve as Containers				
Transmission	WI-FI	Bluetooth	NFC	Zigbee	RFID
Species	WI-FI	Bluetooth	NFC	Zigbee	RFID
Speed					
Distance					
Security and stability					
Conclusion	Since There is Network Coverage Everywhere and Users need to Get Information at Any time, So I Choose WiFi.				

## / Sketch

**/ LOGO**

Owls are Animals Live in the Forest, so They are Close to Plants. And the Owls Rest during the Day and Active at Night. This Kind of Schedule also Reflects the Life of Chinese Officers Always Work Overtime until Midnight.

**/ Interface****/ Final Outcome****Self Reflection****Personally**

Most multicellular organisms have bioelectricity for internal information transmission. From the perspective of interaction design, this is also a relatively new way of communication. In the long-term development, this can solve the experience of simple cross-species conversation.

**Socially**

As an interaction designer, I think my social identity is a server. So this product starts from the emotional needs of workers, fills their empty hearts and protects the environment.

**Future Plan**
